AMENDMENTS TO THE CLAIMS

A listing of the claims presented in this patent application appears below. This listing replaces all prior versions and listing of claims in this patent application.

Claim 1 (currently amended): An automated teller machine for performing a cash transaction, comprising:

a currency deposit/withdraw port for depositing/withdrawing a currency;

a discriminating unit for discriminating a currency;

a plurality of cassettes each thereof detachably mounted with respect to said automated teller machine and for storing therein a currency, with the currency being transferred between a cassette and the currency deposit/withdrawal port via the discriminating unit; [[and]]

a control unit for storing therein operation information used to operate said automated teller machine in correspondence with a money sort of the currency stored in said cassette which is set to said automated teller machine, and for performing a control operation based upon said stored operation information, said stored operation information contains discrimination information indicative of a range of a currency which is discriminated by said discriminating unit, wherein said control unit acquires money sort information from cassette information [[set]] which is set to said automated teller machine, and judges as to whether said money sort information of the acquired cassette information is located within a range of said discrimination information, said control unit operates said automated teller apparatus based upon said money sort information of the operation information when it is so judged that said money sort information of said acquired cassette information is made coincident with said money sort information of the previously stored operation information; and

a staff member panel for displaying thereon, which is operated by a staff member, wherein when it is so judged that said money sort information of said acquired cassette information is not made coincident with said money sort information of the previously stored operation information, said control unit displays said a fact of "non-coincidence" on said staff member panel.

Application No.: 10/022,848

Claim 2 (original): An automated teller machine as claimed in Claim 1 wherein:
said control unit sets, or changes said operation information stored in said control unit.

Claim 3 (original): An automated teller machine as claimed in Claim 2 wherein:
said automated teller machine is further comprised of:
a staff member panel for display thereon, which is operated by a staff member; and
said control unit sets, or changes said operation information by using said staff member
panel.

Claim 4 (original): An automated teller machine as claimed in Claim 1 wherein:
